Eddy Hernandez

Detail-oriented and proactive Software Engineer with a **strong background in DevOps**, automation, and CI/CD. Experienced in designing and maintaining pipelines, managing infrastructure as code, and leading migration projects across GitHub, Jenkins, Terraform, and Harness. Passionate about continuous improvement, documentation, and teamwork.

EDUCATION

Mariano Galvez Univerity, *Bachelor of Engineering in Computer Systems: Computer*

11/2015

Work Experience

PayPal, *Senior Software Engineer*

Remote - 03/2019 - 10/2025

- **Provisioned** a full **Jenkins CI/CD platform** with **Packer, Terraform, and Puppet**, enabling migration from on-prem data centers to **Google Cloud**.
- **Built and maintained** a **Jenkins shared library**, boosting developer productivity and CI/CD consistency.
  Developed and deployed containerized **Go-based automation tools** and sidecar services, improving efficiency across 100+ apps.
- **Led CI/CD architecture**, streamlining deployments and introducing user-friendly automation frameworks.
- **Directed major migrations**—**Bitbucket → GitHub**, **Nexus → Artifactory**, **Jenkins → Harness**—delivering seamless, well-documented transitions with minimal impact.
- **Automated** infrastructure provisioning with **Bash, Go, Terraform, and Ansible**, increasing consistency and operational efficiency.
  Collaborated with teams to align technical requirements and delivery goals.
- **Mentored** junior engineers, strengthening DevOps capability and team growth.
  Authored documentation to promote knowledge sharing and continuous improvement.

XumaK, *Senior Software Engineer*

10/2013 - 03/2019

- **Developed** internal tools and services for developers using **Go, Docker, Kubernetes, and AWS**, enabling efficient cloud deployments.
- **Built** custom **CLI tools** that streamlined workflows and reduced setup and deployment times.
- **Deployed and managed** a **Kubernetes cluster** supporting one-step service deployments and improved reliability.
- **Authored** clear and accessible **developer documentation** for internal tools and processes.

SKILLS

Software development

CI/CD & Automation Tools

Infrastructure as code

Microservices architecture.

Cloud computing

Building Restufl APIs

LANGUAGES
English: Full Professional
Spanish: Native

TOOLS AND TECH
Go, Bash, Groovy
Docker, K8s, Ansible,
Terraform, Puppet

CLOUD
GKE, GCP, AWS, Digital Ocean
